Summary

Full-Stack Developer, Data Engineer, AI Engineer, and with 3+ years of experience delivering scalable end-to-end software applications. Experienced in full-stack development, including backend systems with .NET, NodeJS, and FastAPI + modern frontends with ReactJS, Bootstrap, and Tailwind. Strong foundation in statistical analysis and machine learning, with practical expertise in Python, LLM and data modeling. Delivering cross-platform data pipeline, analytics, and software development to create reliable business decision-making.

Academic Background

S1	Gadjah Mada University, Bachelor of Computer Science <i>Final GPA : 3.81/4.0</i> Relevant Course : Algorithm & Data Structures, Numerical Method and Statistic, Probability and Stochastic, Machine Learning, Image Processing, Deep Learning, Information Retrieval, WebDev, Cloud Computing Thesis : <i>Comparison of the Relevance of Result in K-Means Clustering Recommendation System and K-Nearest Neighbor Classifier Recommendation System in the Case of Drug Distribution</i>	Sept 2020 - Jan 2024
	Kansai University, Student Exchange Course : Business and Economic, Final Project : Luggage Services Business Plan	Jan 2023 - Feb 2023

Research, Organization, and Work Experience

Full-Stack Software Developer @ Freelance / Self-Employed	Feb 2026 - Now
Create scalable project based AI-Agent for mobile & website apps Project : Fintrack, QChatBot, SmartMap	
Data Engineer & Full-Stack Software Developer @ PCI Elektronik Internasional	Aug 2024 - Feb 2026
- Developed and maintained scalable enterprise systems, ensuring robust and easy-to-use applications. Stacks : .NET, Laravel, Python, Azure Cloud, Power Apps - Create Automated operational workflow & Engineered real-time data pipelines for large-scale data ETL, and developed interactive BI dashboard, reducing time consumption, supporting critical infrastructure & BI reporting. Stacks : Apache Spark, Apache Kafka, Ms. Fabric Platform, Power BI, Python, NodeRed, N8N, Power Automate, Growatt - Collaborated cross-functionally with IT-teams & multi-department to deliver end-to-end automation solutions. Project : Automation of FPY/RTY Reporting — Led cross-department automation (Quality & Engineering). Built end-to-end ETL (.NET, Node-Red, Python) and Power BI dashboards for yield tracking (Pass/Reject/Re-Test). Automated daily reports with email triggers, cutting ~80 hrs of manual work to 10 sec. TR/TO & Kitting Dashboard — Created Power BI dashboards for Material Control, Production, and Logistics. Built ETL (Python, Node-Red, Microsoft Fabric) to consolidate data, reducing report time from 4 hrs to 1 sec. Production Turnaround Dashboard — Automated SAP PO ingestion via ETL pipeline (Python, Node-Red, Fabric). Built dashboards & alert systems for late PO tracking, enabling daily reprioritization. Facility & Infrastructure Dashboard — Unified dashboards (Solar, Power, Temp/Humidity, Yield) for centralized visibility and faster decision-making. Visitor Entrance System — Developed QR-based vendor check-in system (Ms.Form, Node-Red, .NET), reducing manual registration from 1 min to 5 sec/person.	
Full-Stack Software Developer @ Qvantage	Jan 2024 - Jul 2024
Project : sgpggrid.com Data analytic platform that provides structured company information and clients insights - Maintain robust code & engineered scalable back-end services, ensuring high performance and reliability - Delivered responsive user-friendly front-end, focusing on usability and accessibility across multiple platforms WebDev-Stacks : ReactJS, Redis, ExpressJS, NextJS, PostgreSQL, Docker, AWS SnowFlakes, Kibana Instances	

Tech Skills

Back-End Stack: .NET, NodeJS, Express, NestJS, FastAPI, Flask, Laravel, TypeScript
Front-End Stack: ReactJS, Tailwind, Bootstrap
Database Stack: MySQL, PostgreSQL, MongoDB, DrizzleORM
Deployment: Docker, VPS + Dokploy, Heroku, Vercel
Programming & Data Science: Python (Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, OpenCV), PHP, JavaScript
Data Engineering & ETL: Apache (Spark, Kafka), Node-Red, Microsoft Fabric
Cloud & DevOps: Azure (ADF, ADLS, Synapse, Databricks), AWS (S3, EC2, SQS), Docker, CI/CD
UI/UX & Tools: Figma, Adobe Photoshop, Jira, Trello
AI/LLM Engineering: RAG, MCP, Vector Databases, Prompt Engineering
Language : Indonesia (Native), English (IELTS - 6.5, TOEFL ITP 620 - CEFR C1), Japanese (JLPT N5 - 131)

Achievement

Awardee of The Innovator Artajasa Scholarship @ PT. Artajasa Pembayaran Elektronik	Nov 2022
1st Winner of Data Analyst - DEXA DIKE Innovation Award @ DEXA Group x DIKE UGM	Nov 2022
